

Histogram Re-streaming

Michael Hart - STFC

Situation

- Events streaming in via Kafka
- We want to have Live Visualization
 - e.g.: Using Mantid Instrument View
- Maybe some live analysis / reduction

Problem

- Event data grows very big very quickly
- Don't want to overload client machines
- Most software expects histograms / counts

Solution

- Convert to histograms on the fly
- Potentially other live processing?
- Push back to Kafka

Discussion

- Feedback
- Additional requirements
- Packaging
 - Docker container?
 - Requires Mantid
- AMOR Simulation?
