Pancake moderator meeting 12th February

1 Attachment, 271 KB

Dear colleagues,

In preparation for Wednesday's meeting on the pancake moderator optimisations, I attach a short description of the current work plan and results. The agenda of the meeting is as follows:

12:00 Meet in ESS lobby for lunch in the canteen  
13:00 Ken Andersen: Welcome  
13:20 Alan Takibayev: Flat moderators and beyond: current status of neutronics work  
13:40 Konstantin Batkov: Through-going beam tube and lead reflector  
14:00 moderator discussion  
14:20 Instrument clip session  
15:00 coffee break  
15:30 Ken Andersen: overview of instrument optimisation work  
16:00 instrument discussion and future work  
16:50 Ken Andersen: wrap-up  
17:00 end

As you can see, there is a 40-minute clip session on the individual instruments. I ask that all those who are attending the meeting and have performed an instrument optimisation, please prepare 2 slides (and only two!), which can be shown in quick succession during the clip session. This will allow us to get a quick overview of what has been done. Let me know if I can help with any questions.

Best regards,

Ken
