

Presentations in FB groups (~1h15m)

- A person presents activity and explains what students should learn by doing it (for about 5-10 minutes)
- The presentation *could* involve that the FB Group tries out part of the activity.
- The other persons in the FB group provide constructive, caring, and clear feedback (10-15 minutes).
- Some points of interest:
 - Is it a good type of activity for what students should learn? Could other activities work?
 - Is it clear from a student point of view what the student should do? How could it be made clearer?
- You have about 15~20 minutes per person.
- Sum-up the feedback on your reflection page during the last 15 minutes
