

Status of BIFROST CIDL

PRESENTED BY JOAKIM MEYER

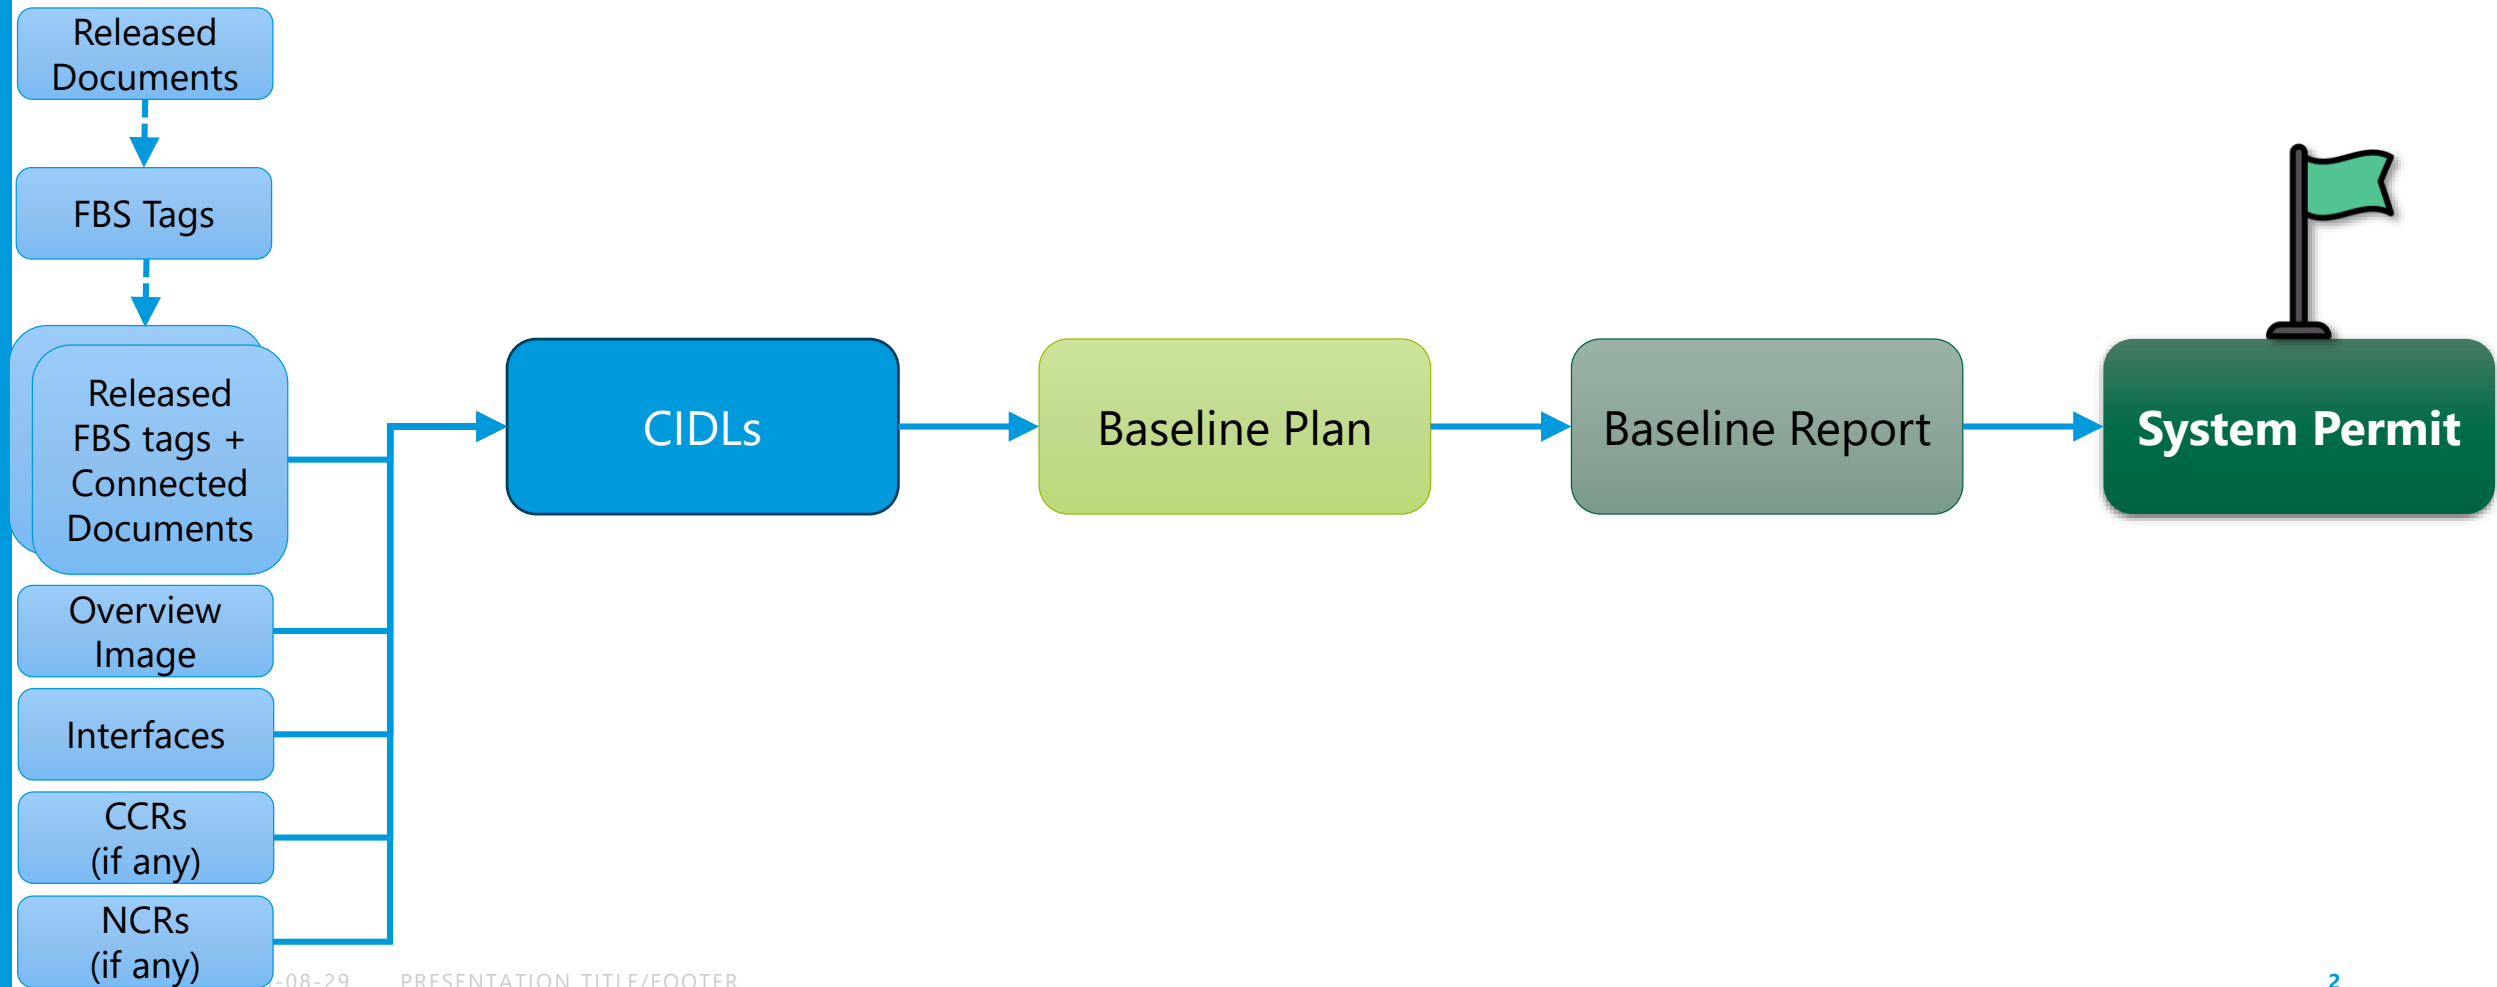

2025-08-29

Facility Baseline (CIDL Status)

Configuration Management In a Nutshell

Pre-requisite for:  System Permit (then later Beam Authorization)

Agreed process for CIDLs and baselines

The process for the individual instruments in Tranche-1 is slightly different than the other projects and for the upcoming instruments.

- The CIDL will be a combined As-designed and As-Verified
 - As-Verified is integrated testing of the instrument without beam
- CIDL shall be prepared at SAR, but not released
- Any findings in SAR that are to be solved before the iSRR shall be implemented in the CIDL to the iSRR
- The CIDL and Baseline Plan Report shall be prepared and released by the iSRR

Status of BIFROST CIDL

- CIDL has been updated with documentation captured in the Green, Orange and Red pages for the instrument (<https://chess.esss.lu.se/enovia/link/21308.51166.20401.38087>).
- Documentation mentioned in the V&V plan has been added.
- Documentation has been added to the FBS and is prepared to be released.
- The expected documentation (design, verification and operation and maintenance) exists
- Missing documentation and verification is for the control systems Data Management & Experiment Control System BIFROST (=ESS.NSS.H01.BIFRO.K02)
- One is open NCR 10525 - Absence of CE marking, or related documentation
