

4th International Workshop on Accelerator Radiation Induced Activation (ARIA'17)

Tuesday, 23 May 2017

Design studies - Gästmatsalen (09:00 - 11:30)

-Conveners: Stefan Roesler

time	[id] title	presenter
09:00	[35] Induced activation studies for the LHC upgrade to High Luminosity LHC	Dr ADORISIO, Cristina
09:20	[18] Development of Compact Accelerator Neutron Source	Dr MARCHIX, Anthony
09:40	[93] Study of the collimators for curved beamline at ESS	Dr SANTORO, Valentina
10:30	[39] A Monte Carlo study on neutron activation in neutron detectors with Ar/CO2 counting gas	DIAN, Eszter
10:50	[40] Discussion on the low activation design method for the accelerator facility by low activation concrete and radiation shielding flexible material	Dr KIMURA, Ken-ichi
11:10	[11] Development of Low-Activation Concrete for Medical Accelerators	Dr STICHELBAUT, Frédéric
