

Halls and Infrastructure feedback

BEER, HEIMDALL, MAGiC and NMX

Halls and Infrastructure feedback

BEER, HEIMDALL, MAGiC and NMX

- Focused on the E01 and E02 specificities

Halls and Infrastructure feedback

BEER, HEIMDALL, MAGiC and NMX

- Focused on the E01 and E02 specificities
- **Cranes:**
 - Multiple instruments will be installed in parallel: what about the logistic ?
 - Instrument specific: maximum load ?

Halls and Infrastructure feedback

BEER, HEIMDALL, MAGiC and NMX

- Focused on the E01 and E02 specificities
- **Cranes:**
 - Multiple instruments will be installed in parallel: what about the logistic ?
 - Instrument specific: maximum load ?
- **Floor:**
 - Dealing with the 3 m beam height: how to lift SE inside the cave
 - Possibility to exceed the 20 tons/m² limit
 - Effect of hole cutting on the stability of the slab
 - Available space for moving shielding, exp. cave walls, ...
