

Instrument TG2 Review: Freia Project planning & milestones

Review

Date
17 January 2018

Technical Reviewer:
Jörgen Andersson

The following are the review recommendations for FREIA's Work Package Specification document to be approved at TG2:

- 1. The document title shall refer to FREIA, not LOKI** (classical copy paste issue?)
- 2. 4.2 milestone plan**

For consistency with other instruments the following milestones should be added:

- 'bunker feedthrough design frozen': Please define ready date
- 'Start in-bunker priority installation' : Please use date Jun 2023
- 'End in-bunker priority installation' : Please use date Aug 2023

Optional to add the following MS:

- 'Start in-bunker partial first installation' : Oct 2022
- 'End in-bunker partial first installation' : Dec 2022
